

A Beautiful Question: Finding Nature's Deep Design

In this scientific tour de force, world-class physicist Frank Wilczek argues that beauty is at the heart of the logic of the universe, a principle that has guided his pioneering work in quantum physics. As this book demonstrates, the human quest to find the beauty embodied in the universe connects all scientific pursuit from Pythagoras and Plato on to Galileo and Newton, Maxwell and Einstein. Indeed, Wilczek shows us just how deeply intertwined our ideas about beauty and art are with our scientific understanding of the cosmos. Gorgeously illustrated, *A Beautiful Question* is the culmination of Wilczek's life work and a mind-expanding book that combines the age-old human quest for beauty and the age-old human quest for truth.
