

Adolescent Psychiatry, V. 26: Annals of the American Society for Adolescent Psychiatry (Volume 26)

Volume 26 of The Annals begins with essays that address the challenge of maintaining human connections in a biological century; Philip Katz focuses on the human encounter between therapist and patient whereas Vivian Rakoff emphasizes the continuing identity of the healer throughout history. Papers on adolescent development, which challenge readers to look beyond preconceived ideas, include Robert Galatzer-Levys examination of adolescence as a social construction expressed in contradictory cultural narratives and Jack Dreschers exploration of the developmental narratives of gay men in order to illuminate the seeming invisibility of gay adolescents. A section dedicated to Trauma, Violence, and Suicide explores interventions with special groups of high-risk adolescents, including violent offenders, suicide attempters, and adolescent refugees. A special section on attention deficit/hyperactivity disorder and conduct disorders includes a debate on whether or not conduct disorder is actually a valid diagnosis. The final section of Volume 26 addresses social issues of continuing relevance to adolescent psychiatry: the juvenile death penalty and gays in the military. Reprinted here are the ASAPs position statements on these two issues along with its amici curiae brief in support of the petitioner in the landmark Supreme Court case of Thompson v. Oklahoma. Volume 26 of The Annals tracks the continuing evolution of adolescent psychiatry as it strives to keep pace with therapeutic and social responsibilities which, in the 21st century, have become increasingly intertwined. We have here a typically thoughtful compendium that, in drawing attention to the pressing issues before those who work with adolescents, highlights both the fields achievements to date and the work that lies before it.
