

Bulletin of the American Museum of Natural History Volume 23

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 edition. Excerpt: ...Flood plain. Mesquite association. Station III. Rillito Creek. north of Tucson. Substation 1. Stream bed. 2. Banks. Willow-Poplar association. 3. Flood-plain. Mesquite association. Station IV. Mesa and foothills northeast of Tucson Mountains. west of Tucson. Substation 1. Hills. SuahaiOcotillo association. (Fig. 15.) Z. Slopes. Creosote bush association. 3. Bottom of arroyos. Acacia association. Station V. Alluvial slopes southwest of Santa Catalina.lts., northeast of Tucson. Substation 1. Hills. Suaharo-Ocotillo association. 2. Slopes. Creosote bush association, 3. Bottom of arroyos. Acacia association. Station VI. Lower part of Sabino Canon. Substation 1. Stream. Association of aquatics. 2. Bottom of Canon. illo-Poplar association. _ _1 Most of the arable land in this region along the Santa Cruz River, and about Tucson. the Orlslnfl Dlflls have been mostly removed so that this zone may now very appropriately be cal ed the zone of cultivated ?_eds. as suggestecl to me hr Prof. Spalding. In our collecting. however. we confined our attention to loca ities where original conditions still prevail. Localii.--A number of specimns of this Spadefoot were taken at Tucson, where it is apparently a common form. Description of S)(I.I7Ztl8.--These specimns have the coarsely tuberculate skiii, obscure parotids a iid rather distinct tynipniiiiin characteristic of S. coucliii. Color above diil l brownish yellow to bright greenish yellow, with an irregular network of br own bars. These may be broad and fewer with broad intersp-aces, or iiarro spaces. Tubercles on the back (except between the hind limbs) black, those on the Sl(ICS, and

on the...
