

The No Such Couple Paradox

The No Such Couple Paradox is an ebook that presents a brand new theory explaining human sexual attraction. Our love choices depend on facial features. Other factors naturally gain importance in later stages. Apart from scientific analysis, the ebook covers a wide range of other topics: from dating and matchmaking to plastic surgery. More than 30 studies are mentioned. The Hormonal Law of Attraction is evidenced by the eponymous No Such Couple Paradox. The author challenges anyone to overthrow his findings: Find at least one celebrity couple in the whole wide world, or should I say World Wide Web, that contradicts my theory, in particular the titular Paradox!
