

## Bulletin of the Bureau of Fisheries Volume 9

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 Excerpt: ...more and more of the alimentary canal, it would probably from the very beginning become wider: the space from  $x$  to  $x$  would increase in width. The increase in width would naturally bring it about that a much larger part of the mesoderm plate would be delaminated than was formerly the case; there would constantly be less and less of the mesoderm which would have to arise as an outgrowth. Finally the condition in the Teleost would be reached, in which the mesoderm plate is split off from the primitive hypoblast along its whole width. V. FORMATION OF THE ALIMENTARY CANAL. The alimentary canal is formed from the simple entoderm lamella by a process of folding along the median line (Fig. 76, Pl. xcvn). The fold is converted into a tube by the meeting of its lower edges. There is a solid postanal gut formed as a thickening of the entoderm lamella, not as a fold. At the end of the postanal gut is Kupffer's vesicle, which is formed in essentially the same way as the permanent alimentary tube. It is scarcely necessary to say that Kupffer's vesicle and the entire postanal gut atrophy. It seems worth while to give a detailed description of the formation of the alimentary canal, and this will best be done by going methodically through the several stages, taking up each series of sections at the posterior end of the embryo and passing forward. The formation of the alimentary canal begins first in the region of Kupffer's vesicle and very shortly afterwards in the branchial region. Some hours before the closure of the blastopore the entoderm cells of the nonenteric streak (. str.) become columnar (Fig. 60, Pl. xcv). These cells subsequently inclose Kupffer's vesicle. The rest of the entoderm lamella in

this stage is made up of flattened cells.  
Stage of 35 hours (F...
