

The Spring 1986 Program in Geometric Function Theory (GFT) at the Mathematical Sciences Research Institute (MSRI) brought together mathematicians interested in Teichmüller theory, quasiconformal mappings, Kleinian groups, univalent functions and value distribution. It included a large and stimulating Workshop, preceded by a mini-conference on String Theory attended by both mathematicians and physicists. These activities produced interesting results and fruitful interactions among the participants. These volumes represent only a portion of the papers that will eventually result from ideas developed in the offices and corridors of MSRI's elegant home. The Editors solicited contributions from all participants in the Program—whether or not they gave a talk at the Workshop. Papers were also submitted by mathematicians invited but unable to attend. All manuscripts were refereed. The articles included here cover a broad spectrum, representative of the activities during the semester. We have made an attempt to group them by subject, for the readers' convenience. The Editors take pleasure in thanking all participants, authors and referees for their work in producing these volumes. We are also grateful to the Scientific Advisory Council of MSRI for supporting the Program in GFT. Finally thanks are due to the National Science Foundation and those Universities (including Cornell, Michigan, Minnesota, Rutgers Newark, SUNY Stony Brook) who gave released time to faculty members to participate for extended periods in this program.

The Grizzly, Un Llamado Inaudible: Las aventuras de Ricky y Fucho (Volume 1) (Spanish Edition), Proceedings on the Conference on Changes in the Biota of Lakes Erie and Ontario, 1969, Bulletin of the Buffalo Society of Natural History, Volume 25, Number 1 : 84 pages with 19 figures., Language Helper Ingles (English and Spanish Edition), The family flora and materia medica botanica containing the botanical analysis, natural history and chemical and medical properties of plants /illustrated by colored engravings of original drawings, copied from nature by Peter P. Good ..., Touched by the Wild Again: REVISED EDITION,
