

## A Treatise on Agricultural Chemistry Intended (Classic Reprint)

The reasons which have induced me to publish the following treatise are, a desire to supply a want extensively present amongst Agriculturalists, for such general knowledge connected with chemistry as may assist them in their various operations, and also the belief that no work of the kind at present exists, in which the subject chosen is either so fully explained or so well adapted for general perusal. Until a very recent period, great doubt has existed amongst all writers on Agricultural Chemistry, as to the manner in which plants assimilate the matter composing their structure, not to mention the source from which these matters are derived. In the following pages I have endeavoured to explain these hitherto mysterious operations of nature, in such a way as to be of easy comprehension to all who will take the trouble to investigate the subject. (Typographical errors above are due to OCR software and do not occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
