

Engineering Chemistry

The book contains 13 chapters, out of which 6 chapters are based on physical chemistry. In many cases step-by-step proofs are given to establish with the assumptions on which they are based and the approach will be found to be academically respectable. The present treatment fully covers the B.Tech chemistry course and also includes many topics required in B.S.c Pass and Honours courses. The topics are profusely illustrated by worked-out examples. This book is targeted towards students of engineering and general chemistry students. Contents: 1. Thermodynamics-I 2. Thermodynamics-II 3. Chemical Kinetics 4. Catalysis 5. Electrochemistry 6. Solid State Chemistry 7. General and Co-ordination Chemistry - Chemical Bonding - Co-ordination Chemistry 8. General Organic and Polymer Chemistry 9. Fuels and Combustion 10. Characterization of Organic Compounds 11. Phase Equilibrium 12. Corrosion 13. Environment and Pollution Also available: Experimental Biochemistry: A Student Companion - ISBN 1904798519 Heterocyclic Chemistry - ISBN 1848290012 Anshan Publishers is a publisher of fine medical, scientific, and technical books. We find the best titles from our worldwide publishing partners and bring them to the global marketplace. We publish in a wide range of fields, including:- Biological Sciences Biotechnology Chemistry Engineering Material Science Microbiology Pure and Applied Physics Pure and Applied Mathematics Statistics
