

All of life can be a resource for our learning. In his fourth and most personal book, Patrick Casement attempts to understand what he has learned from life, sharing a wide range of those experiences that have helped shape the analyst he has become. Patrick Casement shares various incidents in his life to demonstrate how these helped lay a foundation for his subsequent understanding of psychoanalysis. These examples from his life and work are powerful and at times very moving, but always filled with hope and compassion. This unique book gives a fascinating insight into fundamental questions concerning the acquisition of analytic wisdom and how personal experiences shape the analysts approach to clinical work. It will be of great interest to all psychoanalysts and psychoanalytic psychotherapists.
