

Ditching Dairy: The Simple Solution to Gas, Colic and Other Digestive Issues in Your Breastfed Baby

Dairy allergies affect up to 3% of the population and are the first allergy to appear in children. The most common gastrointestinal issues for infants are caused by cows milk protein allergy (CMA). The symptoms such as gas, vomiting, diarrhea, eczema and colic are commonly misdiagnosed and often lead to issues with poor growth in infants. This easy step by step guide shows breastfeeding mothers how to stop their babys pain within minutes and end the symptoms permanently.
