

The first concerted critical examination of the uses and abuses of indigenous knowledge. The contributors focus on a series of interrelated issues in their interrogation of indigenous knowledge and its specific applications within the localised contexts of particular Asian societies and regional cultures. In particular they explore the problems of translation and mistranslation in the local-global transference of traditional practices and representations of resources.

The Philosophy of Death; or, A General Medical and Statistical Treatise on the Nature and Causes, Backyard Birds, Kids Travel Activities (Little Passenger Activity Books), The American Flora: Or History of Plants and Wild Flowers: Containing Their Scientific and General Description, Natural History, Chemical, Exposing the Satanic Lullaby: aka the conscious choice to remain ignorant., The Naked Ape, a Zoologists Study of the Human An,
